Hose matching guide : A snug fit with approximately 0.5 - 1mm clearance will provide best results

* Primary hose applications are intended as a basic guide only. Unicoil products are compatible with oil, air, water and fuel hoses. Additional applications are possible, refer to hose Min and Max O.D.'s to match Unicoil with other hoses not listed here.

Instructions

Slide the Unicoil to where the bend is required. Position the spine on the inside of the intended bend.

Press and bend the spine until the required bend angle is achieved.

Maximum bend angle is 90 Degrees

For best results create a gradual bend in the spine and avoid making a sharp bend
